## PLANTING AND CARE OF DAY LILIES (HEMORACALLIS)

### Planting and Care of Day Lilies (hemerocallis)

#### Planting Instructions

Day lilies are one of the hardiest, pest free plants. They are intended to grow in gardens or landscaping areas. And grow fast. Additionally, prefer full sun. Similarly, they will grow in large containers, no smaller than whiskey barrels. Day lilies grow very fast. And grow well with a lot of water. But will survive with little water, too.

When growing Day Lilies in containers, make sure it is large enough for overall plant expansion. And water them every two days. Again, best to grow in landscapes. Consequently, they will get plenty of water.

Day Lilies will not require any soil amending. But it is always helpful. Add some organic matter, compost, and or potting mix before planting. Also, add our Power Grow Fall fertilizer at the bottom of the hole. And as a topical dressing each Fall (according to label directions). Place the plant in a hole slightly deeper than the roots. Also, be careful NOT to cover the top of the plant. Water heavily after planting.

#### Fertilizing

##### Fall

Use our Power Grow Fall fertilizer. Do not over fertilize. Especially with a high nitrogen base. Unless there is a minimum of 80% slow release nitrogen (the first number in the mix: **10** -20-20). Additionally, using a different mix without slow release, use a high mineral content. And levels below 10 of the nitrogen count (the next two numbers in the mix: 10- **20-20** ) instead. Also, make sure there is an iron level below 5%. Too much nitrogen will promote excessive leaf growth and few blooms. Furthermore, high mineral count will promote good root growth, bloom color and quantity. Along with much stronger healthier plants. Apply the fall fertilizer evenly around the leaves at ground level. Use about two tablespoons per plant. Fertilize every Fall for healthy plants and multitudes of blooms for the following Spring.

##### SPRING

Use our Power Grow Spring fertilizer. Do not over fertilize. Especially with a high nitrogen base. Unless there is a minimum of 80% slow release nitrogen (the first number in the mix **10** -20-20). Additionally, using a different mix without slow release, use a high mineral content. And levels below 10 of the nitrogen count (the next two numbers in the mix 10- **20-20** ) instead. Also, make sure there is an iron level below 5%. Too much nitrogen will promote excessive leaf growth and few blooms. Furthermore, high mineral count will promote, bloom and leaf color. And bloom quantity. Along with much stronger healthier plants. Apply the Spring fertilizer evenly around the leaves at ground level. Use about two tablespoons per plant. Fertilize every Spring for healthy plants.

#### Container Growing

Day lilies should be in very large pots or containers (such as empty whiskey barrels). They make a great accent when surrounded by smaller plants! Split and re-pot every three to five years or so. Keep wet and fertilize fall and spring with our Power Grow fertilizers.

Uniquely, Day Lilies can be grown in hanging baskets, too. They offer a different look. However, they need to be replaced every two years. Because of their fast growing roots, Day Lilies become root bound, quickly.

Accent with annuals or your favorite perennials suited for hanging baskets. Water heavy every day.

## Summary

### Day Lilies

Grow in wet soils  
Intended for Garden or  
Landscapes  
Prefer full sun.  
Fertilize twice yearly.  
Virtually pest free.

## Limited Six Month Warranty, Shipping Policy, Bulb Orders

Due to the high cost of printing, planting and care guides are provided for all of our plant products for you to download here or at [https://lilyflowerstore.com/care\\_guide](https://lilyflowerstore.com/care_guide). Please do so before planting any of our bulbs/tubers whether in "take home" pots or Bulbs/tubers/ ordered for pickup next Spring. We will, however, place several care guides (as samples) for you to reference in the check in shed.

### Shipping Policy

**Shipping is an additional cost.** All bulb/tuber orders are prepaid and placed over the winter in cold storage to be shipped and planted in the Spring.

We ship UPS or USPS...be sure you have specified which carrier you want and your shipping address is correct when you purchase your bulbs for shipping, and you can ask us for the cost when you place your order. We include material to absorb moisture to prevent rotting. Bulbs are never completely dormant and they should be planted according to our Care Guide as soon as you receive them.

We are not responsible for the treatment of your package by the carrier. As the purchaser, it is your responsibility to inform the carrier of any shipping damage or purchase shipping insurance.

- All bulbs ordered at the festival are prepaid for delivery/shipping the following Spring (starting first week of April).
- We use UPS or USPS as our only shipping agent.
- Shipping fees will be added to your order at the time you pay.
- Shipping dates may vary according to current weather conditions.
- We do not ship internationally or to Hawaii, or Canada.
- Take home pots should be planted ASAP and are NOT covered by our warranty if any of our products remain in their pots for an extended period of time (especially over winter).

## PICK UP AT FESTIVAL LOCATION

All bulb/tuber orders are prepaid at the festival and will be **available the following Spring for pickup** at the festival farm location and should be planted asap after you receive your order. Pickup dates will be listed on our web site (<http://www.lilyflowerfest.com>. and <https://www.lilyflowerstore.com>.) and you will receive several e-mail notifications (or phone calls for those without e-mail) starting March 1 and ending 30 days later that your order is ready for you to pick up. They will be tagged by name in alphabetical with a copy of your order attached to its' container or bag. Your order is placed on tables inside the check in shed located by the picnic tables. They will be available at your convenience 7 days per week, 9am to 5pm for 30 days. **Orders not picked up after thirty days will be placed back into our inventory for resale. No refunds will be give after 30 day period has expired.**

**We are NOT responsible for notifications going into your "junk mail" so please check your "junk mail" often!** If for some reason you cannot pickup your order within the 30 day period, please let us know and we will keep it in cold storage a bit longer.

## WARRANTY

We offer a limited six month warranty for any product you purchase if planted and cared for in a proper and responsible manner. Any product we sell that you are not completely satisfied with, simply return the original shipping label along with your written request for either a full refund (minus shipping fees) or product replacement within six months from the time you receive your product. This does not include our shipping or any handling fees. Since nursery stock is perishable, it is your responsibility, as the purchaser, to strictly adhere to your planting/care guide downloadable from [lilyflowerfest.com](http://lilyflowerfest.com) or [lilyflowerstore.com](http://lilyflowerstore.com). Our warranty does not cover acts of God, frost, draught or any other severe environmental conditions, human carelessness, animal/pest damage, leaving your bulbs in the purchased pot outdoors over winter.

We warranty our products to be true to name, to be in healthy living condition and packaged properly at the time of shipment or your purchase. We are a licensed nursery, inspected by the Oregon Department of Agriculture frequently, and all of our products are certified to be free of insects and contagious plant diseases.
